

Erasmus+ Health Circumstance Scholarship

Erasmus+ stimulates the participation of everyone and promotes an intercultural learning experience for all students.

Additional funding is therefore available for students that want to go abroad and that due to a disability need extra support. For example; special housing, medical support, supportive equipment, mentoring or adjusted study materials.

It can be that due a health circumstance your participation is not possible without extra financial support. It can be that with the Erasmus+ basic scholarship and the Erasmus+ additional scholarship (€250 per month) it is still not possible to go abroad due to a health circumstance and that your situation requires extra financial support. In that case you can apply for an extra health circumstance scholarship.

In the Erasmus+ application procedure in Mobility Online you are able to request this funding for an indicative amount. Afterwards you will be contacted to provide the necessary supportive documents.

The amount will be based on real costs and approved documents for real expenses. These indicative expenses need to be assessed by the Dutch National Agency for Erasmus+ before Fontys can approve it, and the receipts / invoices will be assessed after your mobility for a final approval.

The payment will be included already in your first Erasmus+ payment.

In case of doubts if this funding might be available to you, or if you have other questions, please email studyabroad@fontys.nl The Erasmus+ Team of Fontys will help you further.
