

Welcome at Fontys School of Engineering

Dear student,

In February you will start with your Mechanical Engineering education. We are glad you will be joining us. In this mail we explain the most important topics you need to know before you start.

Fresh @ Fontys website

To help you as much as possible, we have created the site Fresh @ Fontys. You will find all information regarding your enrolment, your first lesson week and lots more. Curious? Please click [here](#) to check it out. Especially, have a close look at the *Laptop and Books* section to discover what you need during your studies and the *My First Week* section to discover how your first week looks like and how you can plan your coming study year.

Diploma check on February 2nd

If you have a diploma from abroad, you need to show your diploma first before your enrollment process can be finalized. Therefore, we ask you to come to our student administration ER 0.47 on February 2nd and ask for Ms Karin van Gompel for the diploma check. If you cannot make February 2nd because you are not in The Netherlands yet, please make an appointment via engineeringeindhoven@fontys.nl.

Introduction event on February 5th

You already received a save the date mail for the introduction event on February 5th. Keep that date free and be in The Netherlands. More details will be shared by our student organization [Innovum](#) soon.

Start study year gathering Mechanical Engineering on February 7th

We organize a start study year gathering for the first year students (attendance is obligatory) where you will receive all information regarding the first lesson week, such as lesson schedule, study mentor and class lists. This gathering will be hosted at our Nexus building in room ER 1.13 (first floor, room 13) on February 7th from 10.00h till 12.00h.

COVID-19 and your arrival in The Netherlands

The situation and guidelines resulting from the corona pandemic are constantly changing. Please click [here](#) to check the current Corona measures when you travel to The Netherlands. Mechanical Engineering has a balanced mix of theory and practice. Make sure you are in The Netherlands on time to make sure you do not miss an essential part of your study. If there are any problems in arriving in The Netherlands on time, inform us as soon as possible.

New contact information

For the enrollment process, you have been using the studyengineering@fontys.nl mail address for questions and information. As you are now starting as a student, please ask any questions regarding your enrolment, dates or any other issues regarding your new education to our student administration office of Engineering Eindhoven: engineeringeindhoven@fontys.nl or by phone: +31(0)8850-77333.

We wish you a challenging and fun study year!

Sincerely,

Fontys School of Engineering
