What to expect from us

Our ultimate aim is to prepare you for a management career whether or not you have academic and/or industry experience. We offer an opportunity to enhance your professional competence with the knowledge, technical capacity and skills demanded in senior management positions dealing with logistics, procurement and supply chain management issues.

Modes of instruction:

At Fontys we believe that a range of different study approaches prepare you best for the business field after graduation; workshops, lectures, group work, guest lectures, assignments, group discussions, logistic excursions and case studies.

What do we expect from you

To study this program you need to have career aspirations in logistics, procurement and supply chain management. You also need to have a great interest in other cultures, as you will study with students from different backgrounds and you will study in two different countries.

Students should be motivated to work hard since the programme has a heavy workload of 90 ECs in 1 year.

The Fontys way of studying

The Fontys teaching style is interactive and student-centred. We expect students to not merely study from books, but to look for solutions to problems themselves (which we call Problem Based Learning). This also means that lectures expect you to actively participate during discussions. Moreover, you'll need to write reports, solve problems in groups, conduct research and learn how to present solutions. Studying in Holland means developing an open mind and increasing your international orientation.

Get the best of 2 countries

Fontys Technics and Logistics in Venlo, the Netherlands is renowned for its expertise in the area of internal and external logistics and has established itself as a non-disputed centre of expertise offering academic courses. Fontys Venlo is located in the nr.1 Logistics Hotspot of the Netherlands.

Plymouth University enjoys an international reputation for its focus on international logistics, supply chain management and marine studies. The postgraduate programmes are managed by a specialist-team of academics from across the University. Many have undertaken doctorates and are members of relevant professional bodies.
